

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

What went poorly?

Where did we have problems?
What was frustrating to us or others?
What held us back?

Annalysing Housing
Prices In Metropolitan
Areas Of India

House price
prediction in a
metropolitan
city in india.

The wealth effect
is likely to cause
an increase in
consumer
spending.

By leveraging
historical sales
data,property details,
and location-specific
information can
accurately estimate
house prices.

India is a valuable
solution for
potential home
buyers, real estate
agents and
investors.

This will cause
higher aggregate
demand, and it is
likely to cause an
increase in real GDP
and a higher rate of
economic growth.

A fall in house
price is likely to
lead to lower
consumer
spending.

I think buying a
house is more
of a sentimental
investment than
financial one.

But if you are
above middle
class, then the
sense of
"ownership" kicks
in.

Business,
innovation
and
employment.

Rent option is
always
cheaper than
own house.

Integrated
rural areas.

Sociocultural
appeal and
quality of
life.

What ideas do you have?

What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?

What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
